16 Schüler:innen der Jahrgänge 8 bis 12 erforschten in diesem Projekt die gestalterischen Ausdrucksmöglichkeiten von Smartphones, Tablets, Laptops, Smartboard, iMacs sowie den darauf installierten Apps.

Zeitgleich wurden Versuche unternommen, zunächst analog gezeichnete Werke digital zu bearbeiten.

Die folgenden Ergebnisse zeigen, dass eine individuelle Handschrift der Künstler:innen trotz Digitalität immer noch möglich ist.

Schüler:innen:

Quint H., Henning K., Felix S., Jan B., Enni B., Ludwig G., Josephine H., Hans W., Henrike W., Paula B., Elina F., Helene H., Tommy S., Maya L., Ole S.
